### **DETAILED ACTION**

Applicants' response to the last Office Action, filed on February 25<sup>th</sup>, 2008 has been entered and made of record.

#### ***Allowable Subject Matter***

1. Claim 1-6 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:  
Independent claims 1 and 2 have been amended to include a new limitation that is supported by the specification. The new limitation is the splitting of the boundary region into two portions, and the diffusion of only one portion of the boundary. The cited and known prior art have taught the correction and diffusion of the boundary with a single correction technique. Braica (US 2002/0097439) has taught the division of an edge region into two portions and the treatment of each side of the edge with a different amount of luminance correction to increase the contrast of the edge region. Thus the division and treatment of boundary portions with different processing techniques was known in the art. However, Kawahara (cited prior art reference) teaches the diffusion of edge regions, which reduces the contrast of the edge in order to remove false edges from the video image. Examiner has found that there is no motivation to combine these references (Kawahara and Braica) without a teaching that it would be favorable to diffuse one portion of the boundary instead of the other portion. Furthermore, claims 3-6 depend from claims 1-2, and thus are allowable for the reasons cited above.

#### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Braica, US 2002/0097439 – teaches division of boundary region and processing of each portion in order to enhance edge contrast.
- Sai et. al., US 7304672 – teaches the division of the boundary into two portions and corrects each portion according to the bordering region (based on luminance to increase edge contrast).
- Kawabata et. al., US 6661469 – false contour correction.
- Enomoto, US 2004/0227978 – enhances edge contrast.
- Mikoshiba et. al., US 6496194 - halftone display method for reducing false contours.
- Kawakami et. al., US 6661470 - halftone display method for reducing false contours.
- Okuzawa and Kimura, US 2003/0048285 – false contour reduction method.
- Jeong, US 2003/0090444 - halftone display method and false contour reduction.
- Lee et. al., US 2004/0070590 – false contour reduction method.
- Kang, US 2004/0155891 – false contour reduction method.
- Kawamura et. al., US 2006/0072044 – false contour reduction method.
